

Corporate Profile

Installations, Inc. has been in business for over 25 years specializing in the fabrication and installation of security enclosures. Installations has a full product line of security accessories, bullet resistant opaque armor and bullet resistant glazing materials to custom fabricate a security enclosure to meet your needs.

From our sales department, through the engineering department, and into our fabrication facility Installations, Inc. has a full staff of experienced employees to serve you. Installations also have professional installations crews to install the job for you. From design through the installation we will be there for you to create your own state of the art security enclosure.

With Installations wide range of security products and ballistic levels we can service your specific needs. Banks, fast food restaurants, convenience stores, utility payment centers and corporate security all have different needs, and Installations has the versatility, knowledge and capabilities to help you. Whether it is a retail establishment or a Government facility the ballistic level may change but the service and craftsmanship will not.

Installations product lines have expanded through the years to meet the changing times. Customers expect and should receive a security system that is both secure and visually appealing. With a full line of glazing options, opaque armor, security doors, package exchange units, transaction windows, and framing systems, Installations can help you meet your security needs.

Installations sales and engineering staff are on hand to help you with your security needs. Whether you need design consultation, product literature, fabrication or installation, please contact us for your security needs.
